Professional Summary

Cybersecurity student with hands-on experience in **SOC operations, security monitoring, threat detection, incident response, vulnerability assessment, and cloud security**. Experienced in analyzing **Windows Event Logs, Sysmon, Linux logs, and Splunk SIEM** to investigate authentication anomalies, brute-force attacks, lateral movement, and suspicious processes. Skilled in **alert triage, IOC extraction, log correlation, incident investigation, Python/Bash scripting, Splunk SPL, and MITRE ATT&CK mapping**. Hands-on experience with **AWS cloud security fundamentals**, including IAM, S3 security, EC2 security, security groups, CloudTrail, and cloud access control concepts. Currently developing knowledge of **Microsoft Azure cloud security and cloud infrastructure**. Seeking a **Cyber Security Intern / SOC Analyst** role to apply practical cybersecurity, cloud security, Linux, scripting, and security operations skills.

Education

B.Tech – Computer Science Engineering (Cybersecurity) SRM Institute of Science and Technology, Trichy
CGPA: 9.2/10 Expected Graduation: 2027

Internship Experience

Cyber Security Intern – SOC Operations (Virtual) Jun 2024 – Aug 2024 Elevate Labs (Skill India / MSME)

- Monitored and investigated **SOC alerts related to authentication anomalies and suspicious processes**
- Analyzed **10,000+ Windows Security and Sysmon logs** for security monitoring and threat detection
- Performed **alert triage, IOC extraction, incident investigation, and escalation**
- Documented security investigations following standard **SOC incident response workflows**

Ethical Hacking Intern (Virtual) Sep 2025 – Dec 2025 InLighnX Global Pvt. Ltd.

- Conducted **vulnerability assessments** on web applications
- Tested applications against **OWASP Top 10 vulnerabilities**, including SQL Injection and XSS
- Validated exploitation techniques in controlled lab environments
- Assisted in preparing **security remediation recommendations and technical findings**

Projects

SOC Attack Detection & Incident Response Lab using Splunk
GitHub: SOC-Splunk-Lab

- Built a complete **SOC lab environment** simulating real-world cyber attacks using Kali Linux and Windows 11
- Detected attacks using **Splunk SIEM** by analyzing Windows Event IDs (4624, 4625, 4688, 1102)
- Implemented detection for **brute force, account compromise, PowerShell execution, persistence, privilege escalation, credential access, lateral movement, data exfiltration, and defense evasion**
- Performed **log correlation, timeline analysis, and IOC extraction** to investigate security incidents
- Applied the full **incident response lifecycle: detection, investigation, containment, and reporting**
- Mapped attack scenarios to the **MITRE ATT&CK framework** for structured threat analysis

AWS Cloud Security Labs
GitHub: AWS-Security-Labs

- Built hands-on **AWS cloud security labs** to understand secure cloud infrastructure and common security risks
- Configured and analyzed **AWS IAM** users, groups, policies, roles, and least-privilege access controls
- Implemented security controls for **Amazon S3** including bucket permissions, access control, and secure data storage concepts
- Configured **Amazon EC2 security** using security groups and network access controls

- Explored **AWS CloudTrail** for cloud activity monitoring, auditing, and security investigation
- Practiced identifying **misconfigurations, excessive permissions, unauthorized access, and insecure cloud resources**
- Applied **cloud security principles, IAM best practices, least privilege, logging, monitoring, and defense-in-depth**

CYBER-SOC v2.0 – Incident Response and Forensic Dashboard
GitHub: CyberSOC Intrusion Simulator

- Simulated a **SOC environment** for real-time threat monitoring and investigation
- Correlated multi-source logs to identify **attack patterns and suspicious IP activity**
- Built automated **forensic timeline reconstruction** for incident analysis
- Implemented **severity-based alert classification and escalation workflow**
- Automated **IOC extraction using Python and SQLite** for security investigation

SOC Threat Detection using Splunk
GitHub: SOC Threat Detection

- Developed **Splunk SPL queries** to detect brute-force attacks and unauthorized access
- Investigated Windows Event IDs **4624, 4625 and Sysmon logs**
- Detected **lateral movement patterns** using log correlation techniques
- Extracted **IOCs** and mapped them to **MITRE ATT&CK techniques**
- Investigated suspicious authentication activity and SSH login attempts using **Linux log analysis**

Web Application Security and Ethical Hacking Projects

- Bruteforce Attack Simulation – Project Link
- Broken Authentication Testing – Project Link
- Command Injection Exploitation – Project Link
- Information Gathering and Reconnaissance – Project Link
- Phishing Simulation and Email Analysis – Project Link

Technical Skills

Cybersecurity: Security monitoring, alert triage, vulnerability assessment, incident response, IOC analysis, threat detection

Cloud Security: AWS Cloud Security, IAM, least privilege, S3 security, EC2 security, Security Groups, CloudTrail, cloud access control, cloud logging and monitoring, cloud misconfiguration analysis

SIEM & Monitoring: Splunk SIEM, dashboard creation, alert investigation, log correlation

Log Analysis: Windows Event Logs, Sysmon, Linux/SSH logs, AWS CloudTrail logs, forensic timeline reconstruction

Programming & Scripting: Python, Bash, Splunk SPL

Database: SQLite, SQL fundamentals, basic database concepts

AWS: IAM, EC2, S3, Security Groups, CloudTrail, cloud security fundamentals

Azure: Microsoft Azure – cloud security and infrastructure fundamentals; currently learning

Linux: Kali Linux, Linux command-line fundamentals, SSH log analysis

Security Concepts: MITRE ATT&CK, incident response lifecycle, OWASP Top 10, least privilege, defense-in-depth

Security Tools: Nmap, Wireshark, Zeek, Burp Suite, VirusTotal

Networking: TCP/IP, DNS, HTTP/HTTPS

Certifications

ISC2 Certified in Cybersecurity (CC) Google Cybersecurity Professional Certificate Fortinet Certified Associate (FCA) in Cybersecurity (FortiGate Operator – NSE 3) Fortinet NSE 1 – Introduction to Threat Landscape Fortinet NSE 2 – Technical Introduction to Cybersecurity

Languages

English, Tamil, Telugu

Availability

Available for **Cyber Security Internships** and entry-level SOC Analyst roles (Immediate)
